

Wellwasser GASTRO Edition V8

Water treatment system for the production of wellwasser®

The GASTRO Edition is a three-stage water treatment system for commercial use in the hotel and catering industry. The system is installed in the drinking-water pipe upstream of the chiller/carbonator so that still and sparkling wellwasser® can be drawn from the dispensing head. The filter system rids the local drinking water of all impurities, unwanted odours, unpleasant tastes and germs.

The result is crystal clear and absolutely neutral tasting, still or sparkling wellwasser®, which is produced on your premises, saving the environment from the harmful impact of goods transportation.

wellwasser® is the alternative to bottled mineral water

More profit, more space, more time, more flexibility, highest quality

Technical details

Activated carbon settling filter 0.5µm

With silver ions against bacterial growth on the filter surface removing unpleasant smells and tastes e.g. chlorine and other unwanted dissolved matter. Dirt and particles larger than 0.5µm (0.0005mm) such as asbestos fibres and cysts as well as cryptosporidia and giardia will be held back by the membrane surface. Organic substances such as pesticides or hormones are bound to the activated carbon.

Natural and precious minerals are retained in the water.

Life span: 14,000 liters or 1 year

Wellwasser Activator

Selected crystals stabilise and vitalise water. The result is incomparable neutral tasting wellwasser®.

Housing: Stainless steel 1.4404

Sterilisation filter 0.1µm

Bacteria and germs e.g. Legionella, Pseudomonas or E. coli are reliably removed by ultrafiltration.

Cut-off: 0.1µm

Percentage of retained

bacteria: >99.99999% >LOG 7

Life span: 6 months

Flow meter

The monitoring unit provides information about the tapped water quantity in liters as well as the period of use of the filter cartridge.

Battery requirement: Button cell CR 2032

Size: Height: 620 mm, Width: 380 mm, Depth: 140 mm

Operating pressure: 1 to 4 bar

Dry weight: 12 kg

Performance: up to 6.6 liters/min

Connections: John Guest ½"
